2. Student Achievement Report/Data
    a. CERT Testing Update
        i. The team discussed some challenges with the CERT Assessment:
            1. With math, many of our students who leave the school building for other opportunities don't receive the traditional math courses that would better prepare them for the SAT.
            2. In order to get a baseline for all students, no students received their accommodations that they normally would on standardized test.
            3. Teachers on the council praised the new CERT program. They think it better prepares students for the real state/nation-wide assessments. The assessment also gave students immediate

feedback when students finished along with resources and support with content that they struggled with.

4. There was some student confusion with the calculator use. Desmos is the suggested calculator the SAT suggests for most students to utilize but many of our students have not had experience with it yet.
